

# THREE POINT LINKAGE

One of the most important items to attach to your Kubota is a Three Point Linkage (TPL). A TPL is universally used on large and small tractors and allows compatibility with a vast array of rear mounted implements. By having a TPL, you can easily attach/detach most implements by CAT 1 or CAT 2 pins. AGMAX supplies TPL kits for Kubota compact tractors and other imported Japanese tractors.

## Five reasons to buy

- ✓ Fully Supported 18 Month Warranty
- ✓ Built Tough for Australian Conditions
- ✓ Quality Build
- ✓ Competitively Priced
- ✓ Suitable for Small Acreage Farms
