

Carryalls are a practical way to carry fertiliser, herbicides, water, diesel, tools, generators, drums, firewood, sprayers or just about any other object that would be heavy to carry.

An AGMAX steel floored Carryall is like having a ute tray on the back of your tractor. It can be used by itself or in conjunction with a Spotpak, Sprayer and Boom, which is perfect for small acreages and an economical way to boomspray. The Sprayer can be wired to your tractor, eliminating the need for a battery and Spotpaks can be expertly matched to a Spray Nozzle Boom for a perfect flow rate. Carryalls can also carry fire fighting equipment and are easy to attach to your tractor.

HINT: A Carryall package like this is really handy for watering orchards and new tree plantings.
